[China Press reporter Lu Jiefu September 26 Palo Alto reported] in order to encourage more people to use zero-emission vehicles to reduce air pollution caused by vehicle exhaust, South Bay, Palo Alto, held Wednesday at the city square in front of electric Expo car show and launched on the same day from the "electric vehicle Week" (EV Week) activities.

The day's activities from 12:00 onwards to 5:00 pm. Activities include free test drive electric cars, the nation's first all-electric motorcycles and the first car solar mobile charging stations for electric car show and so on.

Palo Alto City Council Berman (Marc Berman), Klein (Larry Klein) and Polai Si (Gail Price) took the lead for the Expo opening. Mayor Shi Qiefu (Gregory Scharff) at the ceremony, said Palo Alto is a five-day this year, "electric cars weeks" three cities (the other two cities are San Francisco and San Jose), the purpose is education and demonstration tools, advocacy electric or hybrid cars the benefits to humanity and hope in the near future, electric or hybrid cars to be fully replace the current gasoline-fueled vehicles, and people's lives become the most common zero-emission vehicles.

Activities of the many businesses sponsorship and support, including Tesla, Honda, Toyota, Ford, Nissan, PG & E Corporation, Schneider Electric, Pandora, Zipcar company, City CarShare company, ChargePoint, DriveNow, outlook solar, SAP company, SunPower Corporation and California Center for Sustainable Energy. Mr Berman said that this is the local government, local businesses and encourage the use of electric vehicles between communities to work together as a model.

Governor Brown has set a goal: By 2025, statewide zero-emission vehicles will reach 500,000.

In the Expo site show a selection plug-ins and all-electric vehicles, including the new BMW i3, Ford Fusion Energi, Ford Focus, Ford C-MAX Energi, the Toyota Plug-in Prius, RAV 4 EV, Honda Fit, Toyota Accord, Mitsubishi MiEV electric cars, and the Nissan Leaf and so on.

Scene of the most dazzling hybrid energy vehicles are currently the most watched by the Palo Alto-based Tesla Tesla company produced cars. According to the staff, this car's most popular hybrid automatic energy-saving vehicles, according to different requirements of customers will be upgraded, sales price to 70,000 yuan from the most expensive to reach 10 million.
