Cloud Browser Keeps Experience Consistent Across Devices

February 20th, 2013

We interact with a variety of screens, but now there is no easy way to make sure that information appears consistently from one device to another. The [Maxthon Cloud Browser](#) solves that problem, and allows you to seamlessly access information from desktop, smartphone or tablet.

Your history, tabs, downloads and bookmarks are available regardless of which device you use to access the internet.

Maxthon Cloud works on Windows PC, Mac, Android and iOS. Each platform supported by Maxthon Cloud is closely and cohesively interlocked through Maxthon's innovative cloud engine, C4, a cloud-based application that uploads, downloads and syncs users' web browsing between their devices. TPN Interview by Andy McCaskey, [SDRNews](#) and Daniel J. Lewis, [The Audacity To Podcast](#).
