

High tech approach to healthcare at children's hospital

16 March 2015 Last updated at 08:23 GMT

From touch screen tablets for patients to interactive art, colourful MRI suites and delivery droids which ferry meals, rubbish and pharmaceutical supplies, a children's hospital in San Francisco is aiming to provide a high tech and innovative experience to healthcare.

[UCSF Benioff Children's Hospital](#) is part of a \$1.5bn (£1bn) campus which was financed largely by philanthropists.

BBC's North America technology correspondent Richard Taylor reports.
