

## Native Trails Introduces Tolosa Concrete Sink

Native Trails introduced its Tolosa concrete sink. The company describes the sink as a clean, oval shape that shows off the organic beauty of concrete, at a much lighter weight and with no-fuss maintenance. The Tolosa concrete sink is handcrafted of NativeStone, an innovative, remarkably strong blend of cement and jute fiber that is reportedly lightweight for concrete, extraordinarily heavy-duty in the bathroom and refreshingly easy when it comes to clean-up. The sink features a single bowl with a 3 ¾ in. depth that is crack, stain and scratch resistant. It can be installed as a drop-in or standard undermount. Tolosa is available in Ash, Slate and Pearl finishes.
