### 4. Wild Tile

**Designers:** Lindsay Wilder and Rehanna Hartung of [Lindsay O. Creative](#)

**Location:** Calgary, Alberta, Canada

**Size:** 36 square feet (3.3 square meters)

**Home builder's request.** For this show home, West Ridge Fine Homes tapped designers Lindsay Wilder and Rehanna Hartung to create a bathroom that would be unique and a bit masculine and have an element of surprise.

**Special features.** Graphic black-and-white tile feature wall. Custom floating walnut-veneer vanity with open shelf for towels. Quartz marble-look countertop. **Dark granite vessel sink in matte finish.**

**Designer secret.** "We love floating our frameless mirrors on a 1-inch standoff, with the wall tile tucking in behind the mirror," designer Lindsay Wilder says. "It's an easy way to elevate the look of any washroom, giving the appearance of a fully tiled back wall. We also love mounting our vanity lights

right on the mirror to maximize mirror coverage."

**"Uh-oh" moment.** "Originally the washroom was meant to be a few inches wider, which would have left us with some awkward cuts of tile," Wilder says. "We decided to change the width of the room slightly to accommodate the proportions of the wall tile. Rather than having cut pieces on the ends, it made more sense to lose a couple of inches to achieve a perfect fit with the tile."
