Sink Like a Stone

Small but mighty, the NativeStone Farmhouse 2418 by NativeTrails is a deep, 24-inch single-bowl concrete sink perfectly sized for a smaller kitchen in a guest house, a prep sink or in the laundry room. Its apron-front styling shows off its sleek, organic beauty, but you also can install it behind the cabinet with no apron showing for a more discreet look. Handcrafted of a sustainable combination of natural jute fiber and cement, it's extraordinarily strong and durable while weighing approximately 40 percent less than standard concrete sinks; and its stone-like appearance makes it a natural fit for log homes.

The Specs

Finishes:

Ash, Slate, Pearl

Price: \$1,328
