Centre for Neuro Skills Launches MEDITECH's
Electronic Health Record Solution to Advance Patient Care

Bakersfield, Calif. (Apr. 26, 2023) – Centre for Neuro Skills (CNS), a leader in brain injury rehabilitation services, today announced the successful launch of MEDITECH Expanse, an Electronic Health Record (EHR) solution deployed through MEDITECH as a Service (MaaS). Expanse provides CNS with a single EHR that seamlessly connects patient records across all care teams and facilities. This shared record helps guide clinical and therapeutic decision-making by offering a more comprehensive view of a patient's health history, regardless of when or where a patient received care. The cloud-based system allows CNS' entire clinical and care teams to use mobile devices to view patient records, place orders and document care at any time - whether they are in the clinic, residential facilities or checking their schedule from home.

"CNS is continually investing in our technology to advance our legacy of excellence built on an integrated multidisciplinary approach. That approach encompasses the physical, behavioral, cognitive, psychosocial and self-care aspect of life post injury therapeutic programs that treat the whole person," said Michael McCracken, chief technology officer of Centre for Neuro Skills. "We are delighted to have successfully implemented MEDITECH Expanse. It provides our care teams the latest tools to help improve delivery of rehabilitative therapies and patient outcomes."

Michael McCracken, chief technology officer of Centre for Neuro Skills

Expanse includes intuitive, web-based navigation that presents each member of a patient's care team with real-time information, personalized to their unique workflows and comprehensive security and compliance.

"The nature of neurological rehabilitation care delivery requires sophisticated technologies that support the many therapies and treatments needed to ensure the well-being of the patient. We are proud that The Centre for Neuro Skills has chosen MEDITECH to partner with, and we look forward to collaborating on their digital transformation," said Helen Waters, executive vice president and COO of MEDITECH.
